

Steven W. Pearce, MBA, MPM

CEO, Pearce Sustainability Consulting Group

Joining the launch of GLAM — Global Local AI Mobilization — a movement built on a straightforward idea: the AI powering our future should not cost the Earth to run.

Cloud AI burned 183 terawatt-hours last year. Every prompt burns power. Every response leaves a carbon trail. GLAM advocates for AI that runs locally — on your device, under your control. Private by design. Sustainable by necessity.

The infrastructure choices we make in AI right now will shape our emissions trajectory for decades.

Launched Earth Day 2026 · Part of SF Climate Week
